

## AUGUST DOOR DÉCOR

You will need to stock your cart with several colors construction paper; brown, orange, yellow, green, black, white, a flower color, could be pink, red, or other color. You will also need scissors, Elmer's glue, the patterns, masking tape, and some glitter if you want to give a little eye-catching sparkle.

It is helpful if the resident can see an example of the finished product. This will also provide an opportunity for shared conversation.

Allow the participant to do whatever they possibly can. If they cannot cut, maybe they can choose colors. If they cannot verbalize, maybe they can point to the part next needed. Elicit as much as possible from the individual. If they simply do not respond, then it is up to you to carry on a monologue describing what you are doing and talking about the individual parts. In this case you could talk about bees, bee keeping, flowers, or honey.

Once completed, use the masking tape to hang the hive and its bees on the resident's door.
