

DOOR DÉCOR; MARCH SHAMROCK WREATH

This décor piece utilizes only the shamrock patterns. To add visual interest, use different shades of green paper. Also, to add interest and eye appeal, green or gold glitter can be added to some of the shamrocks.

The foundation of this décor is a large heart shape cut from heavy tag board. The heart is approximately 2 to 3 inches wide. The shamrocks are all glued to this base, filling all the gaps, over-lapping and stacking where needed.

When dry, use a paper punch to punch two holes near the inverted point at the top of the wreath. Run a brightly colored ribbon through the holes and tie a bow. Knot the bow so it holds firm. This way it can not only be an eye catcher but also a hanger.
