

ST.PATRICK'S DAY "GO FISH FOR SHAMROCKS"

This activity requires a "pond" of green shamrocks. These are cut from construction paper, a paper clip attached to each, and tossed onto the floor.

It also requires a fishing rod which is a 3 foot dowel with a string attached and a magnet tied to the end. The participant is required to stay behind a masking tape line placed on the floor. They then swing the fishing line out over the shamrocks and haul them in. As the judge you decide how many they must catch or how close the shamrocks can be.

Once the participant has caught the required number of shamrocks, give them their treat and directions to the next station.

Remember to initial their card!
