

LONG TAILED PUPPETS

BEAVER, SKUNK, AND FOX

The front and back of these puppets are different from each other in that the back piece will have the extended tail. The pattern didn't fit on a single sheet of paper so you will need to copy the tail and tape it to the body in order to get a one-piece pattern. Likewise, the stripe that runs the length of the skunk's body did not fit on one page. There are directions for extending the pattern by approximately three inches to get the correct length, so it fits from tip of tail to top of head.
