

- DOOR DÉCOR; NOVEMBER

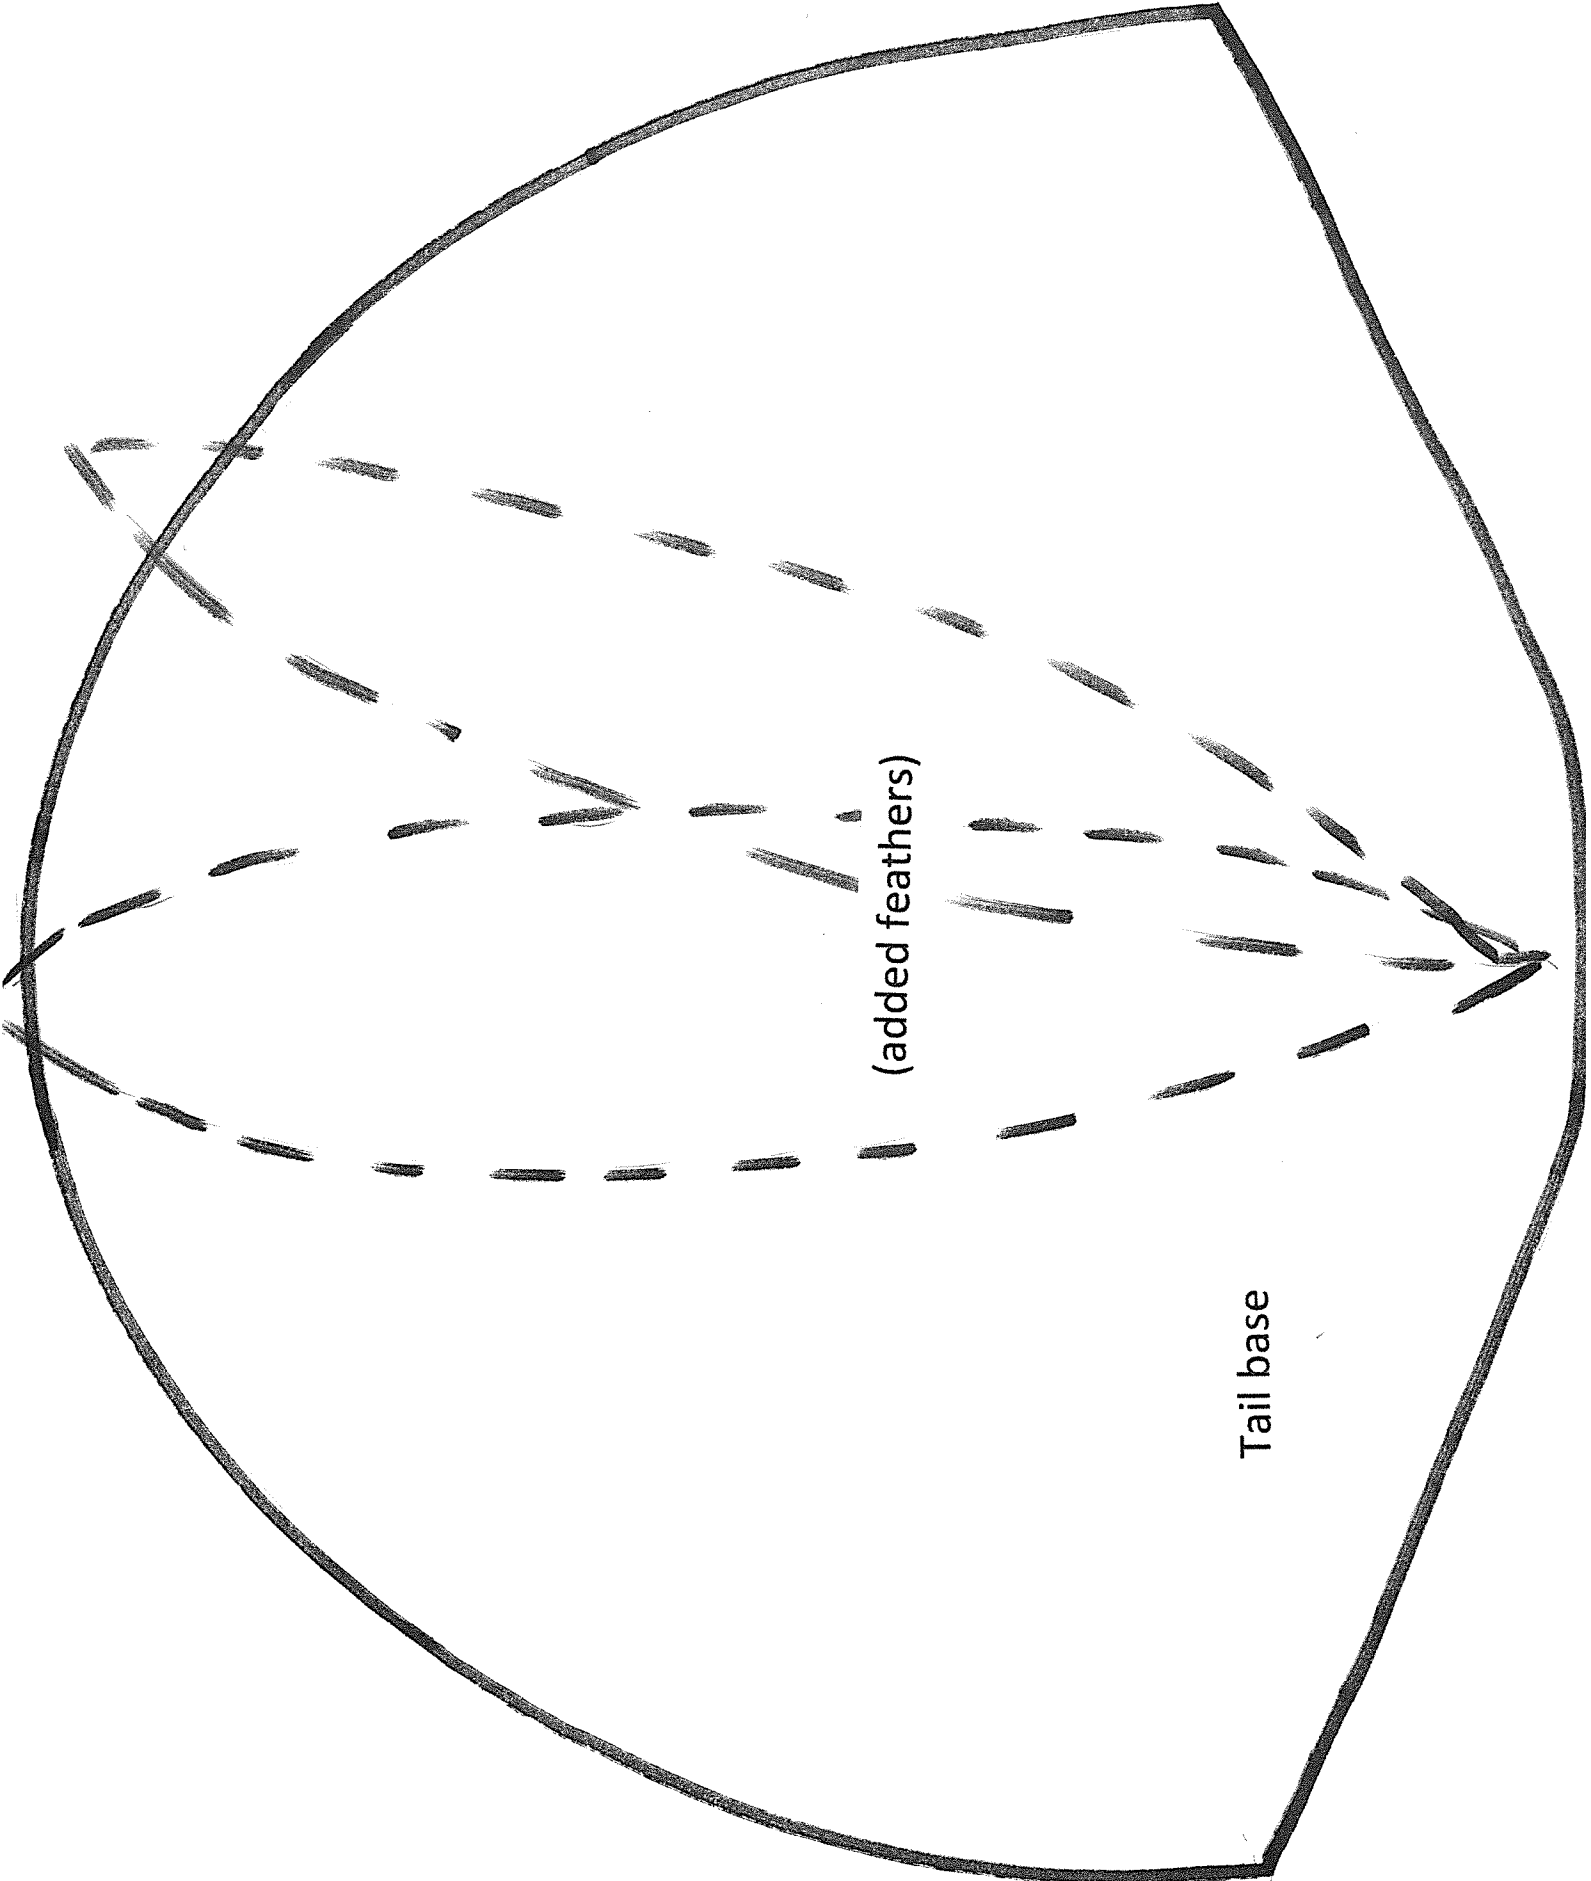

Use the patterns provided to cut out the turkey's body, tail, and other parts. Cut an orange diamond shape for the beak and use a sharpie to make small black eyes close to the beak.

Cut out several individual feathers of different colors and glue them onto the tail form. Then glue the base of the tail even with the base of the turkey's body. Add the hat, with a black belt and gold buckle, and his belt.

One turkey may look a bit lonely on the door so you may want to add a second one or a sign that says "Give Thanks".
